

1600 Series Torsion Assist Lift

Access Covers

EJ is the world leader in the design, manufacture and distribution of access solutions for water, sewer, drainage, telecommunications and utility networks.

We have an unrivalled range of bespoke access solutions to cover all of your needs.

Our torsion lift assist access covers are designed to give the operator easy access to their assets. The torsion lift assist covers are designed to have a maximum lifting effort of 25kg meaning they can be opened through a single person lift.

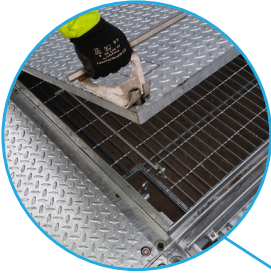

All units are manufactured to order in our UK production facility, meaning we can manufacture to bespoke sizes and configurations ensuring the customers' full needs are met. Configurations include Single, Twins & Multiple units.

We use a variety of materials to meet with your needs, such as mild steel and stainless steel. All manufactured under an ISO 9001:2015 Quality Management System.
