

ALUMATIC®

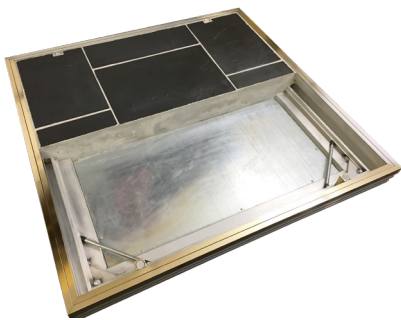

Superior Finish Aluminium Recessed Access Covers

ALUMATIC® is a range of highly specified superior finish aluminium recessed access covers. The high standard of finish and design of the ALUMATIC® range puts it at the forefront of architecturally edged covers.

The ALUMATIC® range of covers are designed to accept a large range of high quality floor finishes including vinyl, tile, carpet, terrazzo etc. The range has been specifically designed for internal applications that include schools, restaurants, shopping centres etc and is available in two different loadings to suit individual application requirements.

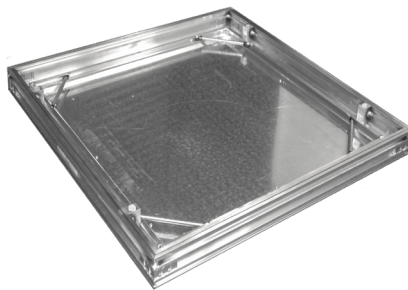

The ALUMATIC® products are designed and manufactured in our UK fabrication facility. This flexibility allows us to meet individual customers' requirements.
